KEY PRODUCT FEATURES

- ✓ *UV stabilised*
- ✓ *Mildew resistant*
- ✓ *High resistance to soiling*
- ✓ *Colour Fast*
- ✓ *Abrasion resistant*
- ✓ *Excellent strength to weight ratio*
- ✓ *Supported by the Nolan.UDA warranty*

CONSUMER GUIDE

The choice of marine fabrics can seem endless and confusing to the end consumer. Whilst the fabric appearance is important, the functionality of the material is crucial to ensure it will perform over many years of service. Understanding each product and its key characteristics is the only way to ensure the correct choice is made. To help make the right decision, a simple guide has been outlined below.

Sunbrella Plus, Seaguard and Mariner are all water proof fabrics making them suitable for marine canopies and bimini tops.

Standard Sunbrella however is better suited for fly bridge side wall enclosures or boom covers due to its breathable finish. If you were looking for an all over boat cover, a light weight, water proof product should be used and Surlast would be the ideal choice. Other criteria to consider when making a final choice is; climate and humidity, expected longevity, care & maintenance and material costs.

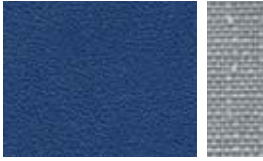

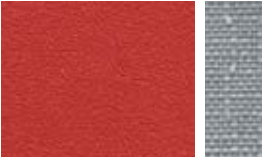

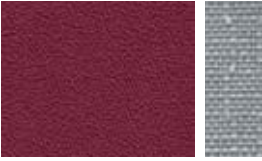

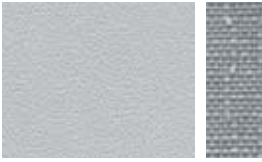

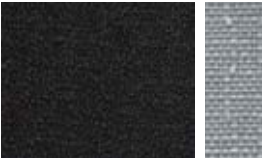

PRODUCT DETAILS

BOAT HOODING

MARINER is a premium grade boat hoarding range specifically formulated to withstand harsh Australian conditions. It's construction features a UV stabilised PVC surface laminated to a mildew resistant polyester backing. Typical applications include completely waterproof marine canopies and covers.

Colour	 Midnight with Grey back	 Dune with Cream back	 Flare with Grey back	 Scuba with Grey back

Part #	04 SUR SAI	04 SUR CHA	04 SUR BLA	04 SUR SAN
Colour	 Admiral Navy	 Aztec	<p>DIMENSIONS: Nominal Weight: 240g/m² Roll Width: 152cm Roll Length: 91.4m</p> <p>*'Solution dyed' means the colouring is mixed before the yarn is extruded, thus penetrating to the fullest extent possible, maximising potential colour fastness.</p>	
Part #	04 SUR ADM	04 SUR AZT		

sunbrella® FURNISHING FABRICS INDENT PROGRAM

Sunbrella Furnishing Fabrics were inspired by the proven performance of the marine & awning acrylic fabrics. The outdoor environment is a harsh test for any type of fabric. Not only does it need to be colour fast, stain and mildew resistant, it must be easy to clean. The Furnishing Fabrics range is a combination of the proven Sunbrella performance with a stunning range of colours and designs suitable for any indoor or outdoor upholstery project. This entire collection is available through Nolan.UDA on an indent basis with a lead time of 2 weeks.
